

Let's Grow Together!

A Simple Planting Guide

You can grow your own Pip at home or school! Here's how:

You'll need:

- A small pot or recycled container
- Soil or potting mix
- A seed (beans, sunflowers, or marigolds work well)
- Water and sunshine
- Patience and care!

Step-by-step:

1. Fill your pot with soil.
2. Use your finger to poke a small hole.
3. Drop the seed in and gently cover it.
4. Water it (not too much!)
5. Place it somewhere sunny.
6. Check on it each day... and watch it grow!

Pip Tip: Don't worry if it takes time. Growing is slow—but magical
